

Pollution and Conservation Worksheet

Around the Kranji Nature Trail

A little bit less

Instructions

1. Take a walk along the Kranji Nature Trail.
2. How do you think the rubbish came to be where it is?
3. How do you think the animals feel about living in such a home?
4. Take note of the amount and type of rubbish you can spot.

Questions

1. How much rubbish can you spot? (Circle the correct answer)

A lot / some / little / none

2. Name a few of the objects that were spotted.

3. What was the most common material in the litter that was spotted?(eg: plastic,glass,paper...etc)

4. Where do you think the litter could have come from?

5. How do you think the litter should have been disposed of?

6. How do you think such litter will affect a mangrove habitat such as this where the wild animals are free to roam as they please?

7. What can you say to people who litter that might make them change their behaviour?
